Dear Sir,

I, Hem Shah, am highly interested in applying for this role, but there seems to be some bug/error on the Microsoft Careers Page. I filled out the information before 10 pm but could not update my resume on the job page (Id: 1416603). When I try to upload a new resume, the uploading Modal keeps buffering in case of uploading from one drive or dropbox, whereas it throws an error while uploading from the local machine. I had also raised a ticket on the Microsoft Support Page regarding this issue but haven't received any response or solution. Hence, I am submitting the application with my old resume and attaching my latest resume here. It is my humble request that you consider my case as it happened due to no fault of mine. Please check the attached pics as proof. I hope my mail reaches the concerned authorities and I get a fair chance over this Job Opportunity.

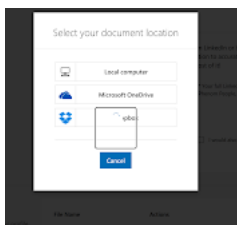

Thanks and Regards,

Hem Shah
